

Annex 3

SAMPLE SELECTION CRITERIA AND PROCESS

Step 1: Selection of Municipalities (according to extent/reach of intervention)

Reference: MRP Database

Criteria: Top 10 project sites with the most numbers of individuals/CSG reached by MRP (by type of intervention) :

- CSG membership (# of individuals)
- CSG IR 1 – livelihood grants (# of grants)
- CSG IR 2 – social cohesion grants (# of grants)
- Various training (# of individuals)

Steps:

- Identify the project sites with the most numbers of beneficiaries per type of intervention.
- Provide a score of 1 for each site per type of intervention
- Compute the total score per project site
- Assign total scores: (5-very high, 4-high, 3-somewhat high, 2-somewhat low, 1-low)
- Other project sites with “0” scores are considered NOT PRIORITY

Step 2: Selection of Municipalities

(according to
security/safety/accessibility)

Reference: Assessment of Enumerators based on the Index

Criteria: Project sites with the highest level of security/safety, road & communication access

Steps:

- Local enumerators assessed each of the 18 priority project sites based on the criteria
- Assign scores: (4-very favorable, 3-favorable, 2-somewhat favorable, 1-unfavorable, 0 – very unfavorable)
- All locations scored as "0" will be considered "No-Go Areas."
- All locations scored as "1" and "2" will be considered "Go Areas with caution"
- Notify Plan International, Ecoweb, and Maradecca and get their confirmation on the "No-Go Areas."

SAMPLING PROCESS FOR THE EXPANDED ENDLINE SURVEY

Intervention group

The locations of the intervention group cross-sectional samples were identified using the following procedures:

1. Municipalities were described based on the extent of MRP intervention. Here the municipalities were scored using a 5-point scale (5=very high, 4=high, 3=somewhat high, 2=somewhat low, 1=low) in relation to number of CSG members, number of CMG IR 1 grants, number of CMG IR 2 grants, number of BRG grants, number of training recipients.
2. Municipalities were described based on safety and accessibility. The municipalities were indexed using four elements namely, communication, road condition, distance, and peace and order. The enumerators having familiarity with the areas were asked to use a 4-point scheme (4=very favorable, 3=favorable, 2=somewhat favorable, 1=unfavorable) to describe each municipality in relation to the four elements.
3. Municipalities were classified as "Go Location" or "Go Location with Caution" by combining the two criteria above. The following table shows the summary of this procedure:

		Extent of Services	Level of Safety and Access (based on local enumerators' assessment)	Final Selection of Survey Locations (Municipality Level)
Balindong	EcoWEB	Somewhat Low	Very favorable	"Go" Location
Baloi	EcoWEB	Very High	Very favorable	"Go" Location
Buadiposo Buntong	MARADECA	Low	Very favorable	"Go" Location
Bubong	MARADECA	Very High	Favorable	"Go" Location
Butig	EcoWEB	High	Unfavorable	"Go" Location with Caution
Ditsaan Ramin	MARADECA	Somewhat Low	Favorable	"Go" Location
Iligan City	EcoWEB	Very High	Very favorable	"Go" Location
Lumbaca Unayan / Lumbaca	EcoWEB	Low	Unfavorable	"Go" Location with Caution
Lumbayanague	MARADECA	Somewhat High	Unfavorable	"Go" Location with Caution
Madalum	MARADECA	Low	Somewhat favorable	"Go" Location with Caution
Marantao	MARADECA	Very High	Very favorable	"Go" Location
Masiu	MARADECA	Somewhat Low	Somewhat favorable	"Go" Location with Caution
Mulondo	EcoWEB	Low	Very favorable	"Go" Location
Poona Bayabao	MARADECA	Somewhat High	Somewhat favorable	"Go" Location with Caution
Saguiaran	MARADECA	Very High	Very favorable	"Go" Location
Marawi City	EcoWEB/MAREDECA	Low	Very favorable	"Go" Location

Comparison group

The locations for the comparison group cross-sectional samples were identified using the following criteria:

1. Risk and Accessibility of non-MRP municipalities (or non-MRP barangays in covered municipalities)
2. Similar geographical and demographic features with MRP's intervention survey sites (e.g. rural/urban, class, population, culture, etc.)
3. Presence of IDPs and HCMs who are not located in MRP project sites (municipalities or barangays)
4. Presence of IDPs and HCMs who have NOT received grants or participated in any activities/trainings under MRP through Plan, Ecoweb or Maradeca.
5. If possible, presence of IDPs and HCMs who have NOT received similar grants or participated in any activities/training of other international donor agencies.
